

ICNS Plenary Session

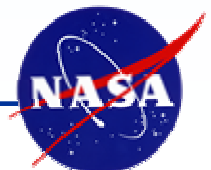

Transforming the NAS

Pete Vrotsos

May 20, 2003

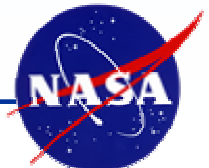

Glenn Research Center

at Lewis Field

ICNS 2003 Conference and Workshop

- Understand current efforts and recent results in near- and far-term research and technology demonstration.
- Identify integrated digital communications, navigation and surveillance research requirements necessary for a safe, high-capacity, advanced air transportation system.
- Foster collaboration and coordination among all stakeholders.
- Discuss critical issues and develop recommendations to achieve the future integrated CNS vision for the national and global air transportation system

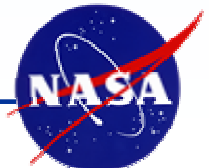

ICNS 2003 Executive Committee

- Robert Kerczewski - Chairman NASA
- Marty Pozesky – Exec Secretary MTP
- George Donohue George Mason Univ
- Al Homans ARINC
- Randy Kenagy AOPA
- Mike Lewis Boeing ATM
- Brent Phillips FAA
- William Sears ATA

Glenn Research Center

at Lewis Field

Major CNS Events “Year in Review”

- Aerospace Commission Final Report
- CPDLC Rollout
- RTCA Concept of Operations and Vision for the Future of Aviation
